

Please reject Petition 04-160 by the National Association of Broadcasters. I enjoy the variety and quality of music and talk provided by XM Satellite Radio. Most of it can not be found on AM or FM stations, even here in the Chicago area. I also get great use out of the Chicago-area traffic and weather reports. XM and Sirius Satellite Radio have taken huge financial risks to get where they are today - to improve the quality and value of radio. Please don't let the "900-lb. gorilla" (the NAB) take it away.

Thank you,
Scott D. Stephens
